About

Dr. Miranda Bradley is a highly experienced and compassionate GP who works exclusively in pregnancy related care, fertility, breastfeeding/lactation medicine and women's and infant health.

A Monash University graduate (2001), she completed her GP specialty training in the UK in 2007 and earned a Diploma in Obstetrics and Gynaecology (London 2005).

With additional experience and training in fertility, pregnancy care, breastfeeding medicine and mental health, Miranda provides extended consultations, ensuring inclusive, evidence-based, and holistic care.

Infant & child health

- General medical care for infants and children under 2
- preventative health and vaccine advice

Mental Health

- Psychological support for women – with specific focus on women's health, fertility, pregnancy & the postnatal period
- Referral for further psychological care e.g. psychologist or psychiatrist
- Preparation of a Mental Health Care Plan (if eligible)
